

## Information About Magee Plastics Company

### Our Start

- Magee Plastics started in 1968, giving us almost 50 years of experience in thermoplastics and manufacturing.
- We are a medium-sized company with nearly 100 employees.
- At Magee, we create custom products as well as refurbishments.

### Our Facility

- We have 100,000 square feet of manufacturing and storage space.
- Our company is sure to have the best equipment available with a wide range of talent on our floor.

### Our Industries

#### RAIL

- Magee prides itself in being the largest supplier of locomotive interiors.
- Our expertise in rail mains and locomotives has given us opportunities with several major rail projects.
- This includes the Dallas Area Rapid Transit, Detroit Q Line, Oklahoma City Rail, and New York High Speed Rail.

#### AVIATION

- We have been working on the interiors of nearly every major aerospace developer since our start in 1968.
- Companies we work with include Boeing, AirBus, Embraer, and Fokker.

#### INDUSTRIAL

- Magee also specializes in a variety of industrial development.
- This includes special projects with medical and military products.

### Our Quality

- Efficient order processing and superior products are Magee's specialty.
- We also takes lengths in ensuring affordable prices by taking extra steps to reuse thermoplastics and lower waste.
